Critique:

12 months. Complete scissor bite. Elegantly built bitch. High on leg. Square in outline. Coat in good condition though rather wavy. Excellent reach of neck. Good withers and top line. Well angulated. Chest sufficiently developed for age. Long head – typical. Ears high set, could be more triangular in shape. Excellent dark eye, good shape. Good length muzzle, typical expression. Good stop. Sufficiently chiselled under eye. Slightly lacking in underjaw. Little on thin side. Steady movement rather high stepping in front. Good tail carriage. Calm presentation.
