**Has been awarded the grading of**

**EXCELLENT**

### **Critique:**

5 years. Complete scissor bite. Smaller size male. Not in full coat. Good outline. Nice square body. Typical head, good proportions. Good stop, good parallels. Chiselled under eye. Excellent dark eye, good pigmentation. Medium ears, high set, well carried. Good neckline. Good top line. Sloping croup. Chest could be little more developed. Good bone. Excellent calm presentation. Moderate angulation front and rear. Steady even movement. Toes in a little at front. Good tail carriage.
