Critique:

4 ½ years. Complete scissor bite. Shown out of coat. Medium head, lacking chiselling under eye. Almond eye, could be more obliquely set. Tall ears, well set and carried. Flat skull, good stop, good parallels. Good reach of neck. Good top line. Chest could be more developed for age. Flat ribs accentuated by lack of coat. Very good bone. Good angulations. Typical in outline overall. Good expression. Good tail carriage. Looks up at handler on move – spoils front movement. Good side gait.
